Action Description

Team notified by email SCC:

Location: , UK. Description of event: Ongoing very strong smell of diesel fuel. Making me feel nauseated and coughing a lot. Definitely cannot be good for the environment. Contact email:

carried out an odour assessment 18/06/2019. could not substantiate a diesel odour. knocked on door at at around 15:00hrs but know one was in. subsequently contacted at 2 sisters. advised the site had hired a pressure washer over the weekend and into Monday, however their own staff had complained about the smell of diesel from it and so they had removed it off site.

sent an email to to advise this, hoped as source has been identified and removed from site there should be no further diesel odour (also did not smell diesel at home when visited). said on email to contact SEPA if need to report future pollution incidents.

24/06/2019 was speaking to 2 sisters regarding other complaints received (20/06/2019) advised that he thought the diesel smell was actually from a fuel oil tank, an engiener had wrongly turned on a heater for the old tank, the fan above was blowing straight towards the coop (george st). advised that it has been di-connected and no longer able to turn on.

***** to check if zana smelt a diesel smell? or only 'chicken' smell when did odour ass*****

NFA- Diesel smell not substantiated by officer at time. Site has advised that they were causing an odour (offensive?) though. On going management of site with regards odour issues.
